COLUMBIANA HI TECH EARNS SAFETY AWARD

KERNERSVILLE, N.C., April 29, 2017 – Columbiana Hi Tech, LLC of Kernersville, N.C., was recently awarded the 2017 Safety Award of Merit from the Fabricators & Manufacturers Association, International (FMA). The award recognizes metal fabrication companies that have an ongoing commitment to excellence in safety. Columbiana Hi Tech, LLC, (CHT) is a manufacturer for the nuclear industry, fabricating products and equipment in its 144,000 square foot welding facility and central machine shop.

“We were honored to receive this award from the FMA, since our efforts to prioritize safety in everything we do at CHT could not be more focused,” said Jim McCann, President & COO. I am not only delighted that our company is a multi-year recipient, but I am also extremely proud of the job that CHT employees do that merits such recognition.”

According to Edward Youdell, President and CEO of FMA, award recipients were selected by the FMA Safety Council. “On behalf of the FMA, I congratulate Columbiana Hi Tech on winning the Safety Award of Merit,” said Youdell, “The companies receiving safety awards this year have set a standard of excellence that all manufacturers should try and match.”

The awards were presented at a recognition dinner at the Annual FMA Safety Conference, held April 19, 2017.

MORE ABOUT

Columbiana Hi Tech (CHT) is a subsidiary of TN Americas and is a leading manufacturer of a wide range of custom fabricated products and equipment for the nuclear industry where precision welding and machining is required. Specializing in nuclear material packaging, CHT is the largest manufacturer of front-end radioactive packaging and a proven fabricator of products for safe transport and storage of used nuclear fuel.
